

WHAT?

The [Michigan Emergency Department Improvement Collaborative \(MEDIC\)](#)'s aim is to increase the number of HIV screenings in the emergency department (ED) to improve early detection and connection to treatment. This will be accomplished in partnership with the [Michigan Department of Health and Human Services \(MDHHS\)](#) through educational series and quality improvement (QI) opportunities.

WHY?

The CDC recommends that everyone between the ages of 13 and 64 get tested for HIV at least once as part of routine health care. The urgent nature of an ED setting offers a unique opportunity to reach a broad, and often underserved, population that may not otherwise engage in routine healthcare; including those at risk for HIV infection.

HOW?

**Learning Series:**

- Virtual learning, over the next 2 years, from experts about topics related to HIV screening, intervention, collaborators, and opportunities
- CMEs will be available

**QI Opportunity:**

- Explore opportunities to evaluate and improve current practices in your organization
- Receive funding to support this effort

BENEFITS

- CME Opportunity
- Additional Funding
- Partnerships with MEDIC, MDHHS, and key players in your ED, administration, and community
- Expertise in program evaluation, improvement, and implementation

**GOAL:**  
75%  
reduction in new  
HIV infections  
by 2025  
and at least  
90%  
reduction  
by 2030.
