**Directors' Column**

Finally. It's going to happen. Not COVID, financial (or real) hurricanes, staff shortages or locusts will stop us. After almost two years we are excited to meet with the MEDIC community again. Hard to believe many of our coordinating center team members have never attended an in person collaborative wide meeting!

Many clinical champions and abstracters from recently enrolled sites will also be first timers while some of our legacy members will be missed due to after-shocks on our institutions. Lots of changes for our MEDIC family. But change can be good, and change is what the MEDIC community does best. When we meet in Traverse City, be sure to say hello to new faces, be generous in sharing lessons learned and tell us all what's new with you since we last saw you in person (Fall 2019)! Relationships make all the difference in working as a team.

And get ready for a new year, spoiler alert, we are AIFK. More information coming, promise!

**Tableau Reporting Update**

Check out the new Tableau "[All Measures Dashboard](#)" available to Clinical Champions, Abstractions, and Administrators. This new collection of reports facilitates performance comparisons at the collaborative, site, and individual provider levels. You should also be sure to check out the new "[Outlier Detection](#)" report which allows easier identification of statistically high-performing and low-performing providers. Questions about accessing these reports or Tableau reporting in general?
